

DENVER, COLORADO, November 9, 2017 – Contour Networks, a wholly owned subsidiary of JCI Group, announces the launch of the Contour Secure Point of Sale SIM product.

This unique product provides secure connectivity to mobile point of sale devices, including terminals and tablets.

The product is packaged as a standard format SIM card, making it compatible with the majority of Mobile POS hardware, but unlike a traditional wireless communication SIM card, Contour's POS SIM service is delivered on a robust, private network. Transactions are sent through a private, PCI-certified network, eliminating exposure and visibility to the open internet.

"We are delighted to launch the revolutionary Point of Sale SIM," says Colm Sharkey, Vice President of Product for Contour Networks. "This one-of-a-kind solution offers a simple, cost effective and, most importantly, secure way to establish a secondary, dedicated network for point of sale traffic. The simplicity of a wireless solution comes together with the peace of mind of knowing that customers' critical traffic is being transported securely."

The Secure POS SIM was recently chosen as the United States wireless solution by Posiflex, a leading worldwide manufacturer of point of sale management and peripheral products, to support the innovative wireless tablet solution for retail and hospitality, the MT-4310W.

"Contour brings a refreshing expertise of secure mobility in the retail space," says Ryan Boyd, Manager of Product Development for Posiflex. "By joining the security and flexibility of the POS SIM with the efficiency, engineering innovation and all-in-one simplicity of the MT series tablet, we have created what we believe is a truly exceptional solution."

The Secure POS SIM product will be available globally and will be sold with annual, auto renewable service plans to eliminate complicated budgeting and billing procedures.

About Contour Networks

Contour Networks was founded in 2006 to service the ever-growing need for secure and reliable wireless data services and has evolved into a technology leader in the communications space. Contour Networks and Contour Networks Japan are subsidiaries of JCI Group Companies with headquarters in Atlanta and offices in Tokyo, Denver, and Kansas City. JCI is listed in the Tokyo Stock Exchange (9424.T).
